

# How to use an emergency care hospital

Ambulance call 119

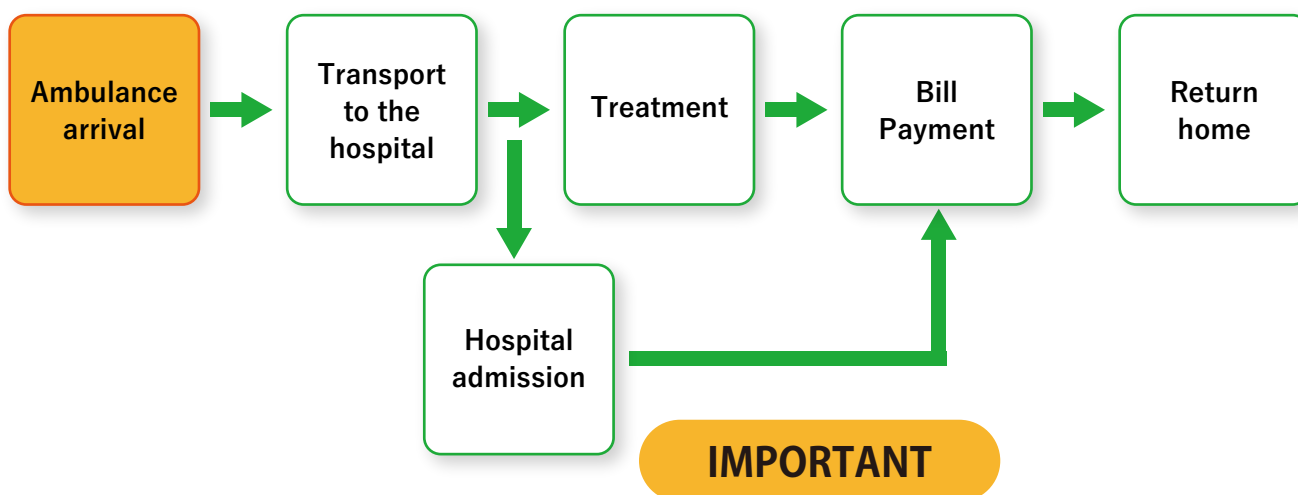

If you need an ambulance, show the sentence below to a nearby Japanese person so they will call one for you.

救急車を呼んでください

PLEASE CALL AN AMBULANCE

Be transported to an emergency care hospital in the event of a traffic accident or other emergency.

## Procedure from arrival of the ambulance

**IMPORTANT**

You cannot choose what hospital you will be brought to. Depending on your condition, you may be given treatment without questioning.

**AED**

There is a device that can be used if someone has heart problems and collapses while out of the home. This device is called an Automated Defibrillator (AED). When actually using the device, you find illustrated instructions inside the AED package after you open it, so follow those instructions. Many airports and other public facilities have AEDs.
